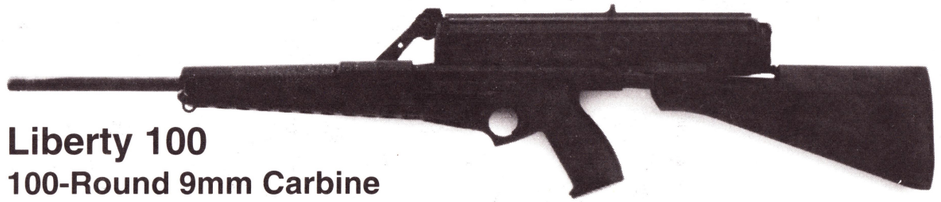
The LIBERTY Series

Calico's legendary helical feed magazine design in two new 9mm models!

The new Liberty firearms are a revolution in firepower. Based on our internationally patented helical feed magazines, each Liberty series firearm offers exclusive advantages in weight, capacity, and performance. Field stripping in seconds with no tools, the Liberty series sets a new standard for simplicity, reliability, and firepower.



Liberty 100

A REVOLUTION IN FIREPOWER!

CALICO®
LIGHT WEAPON SYSTEMS

★ MADE IN THE U.S.A.

50 or 100 round capacity, right on target!

The weapon systems designed and manufactured by Calico have begun a revolution in firepower. Calico's internationally-patented helical feed magazine design has enabled it to offer significant improvements over typical rifle and pistol configurations. These advancements combine to create some of the most accurate, lightweight, and reliable firearms available.

• Extra-strength, high-tech materials are used throughout the design to enhance performance, reduce weight, and provide durability.

• The center of gravity is positioned over the shooter's wrist providing better balance, greater accuracy, ease of handling, and less fatigue.

• The grip is located directly behind the barrel centerline, offering greatly reduced recoil effects and enhancing hit probability shot after shot. The fully-adjustable front sight post is complemented by the rear flip sight which offers a 'combat' or 'ghost ring' selection.

• Calico's top-loading, bottom-ejecting action enhances safety during close-quarter operation, since ejected brass travels straight down. This allows for use of a practical brass catcher. Bottom ejection also makes for a truly ambidextrous firearm, with the safety selector on both the right and left sides of the weapon.

• The static cocking lever provides an additional level of safety and reliability, since it remains stationary as the firearm is discharged.

• A two-position bolt catch holds the bolt at half-open for chamber inspection, or fully-opened for complete inspection and ready to chamber a new round.

• Since no bulky magazine protrudes below the weapon to impede movement or operation, the shooter may assume a very low profile.

• Calico firearms field-strip in seconds without tools, and the entire bolt assembly is removable as a single unit.

• Calico's unique magazine can be stored fully loaded for an indefinite period of time without experiencing 'spring set' and can be charged in seconds for use. The two-phase clutch allows tension release for re-storage.

• The moveable feed lip on the magazine allows for rapid loading and unloading. (Optional speed loader available.) Visual count apertures on the top of the magazine indicate the current ammunition inventory.

A full line of Calico accessories are available to customize your firearm to specific applications. Ask your dealer for details.

9mm

Semi-Automatic

The light weapon systems manufactured by Calico are unlike any weapons you've ever experienced. Based on our internationally- patented helical feed magazine design, each Calico weapon offers exclusive advantages in capacity, weight, and performance. These top-loading, bottom ejecting firearms are ideal for close-quarter operation, where firepower and control are essential. Muzzle climb during rapid fire is virtually eliminated by superb mechanical and ergonomic design, resulting in devastating accuracy. Field-stripping in seconds without tools, Calico light weapon systems provide simplicity and reliability with an overwhelming firepower advantage. Designed and manufactured in the USA, Calico has truly begun a revolution in firepower.
